Technical Skills

- Typescript	- Python	- Node.js	- PostgreSQL / MySQL
- React	- Django	- Kubernetes	- Docker
- JQuery	- CircleCI	- Jest	- Webpack / Babel

Professional Experience

Full Stack Software Developer Elevations Credit Union

07/2023 - 09/2023

- Built and deployed a mortgage lead app suite in collaboration with architects and product managers, generating \$12 million ROI
- Implemented PDF generation using dynamic HTML templates, reducing wait time for clients by over 95%
- Created new UX branching feature for public facing website, serving over 30,000 people a day
- Automated linkage of URLs for new website content, reducing needed developer time by allowing Product team to change in Contentful
- Engineered and tested multiple, security-sensitive REST APIs including consumption of third party vendor APIs
- Mentored 2 full stack interns, including code-base introduction and proper documentation practices
- Performed routine code reviews to promote coding best practices

Associate Full Stack Software Developer Elevations Credit Union

03/2022 - 06/2023

- Led technical design and implementation for public facing UI of the mortgage app
- Refactored common components within UI library package, resolving tech debt and simplifying integration processes for new projects
- Presented on new technologies and best practices at weekly developer meetings
- Streamlined CI/CD configurations for deployments of subsequent releases
- Spearheaded the initiative to migrate developers' build environment to Unix from Windows

Software Engineer - Contract (per diem)

07/2023 - 09/2023

HunnyChef

- Refactored a simple dropdown into a sorted input, creating an easier UI experience for users
- Implemented a donut chart to represent profile completion

Optical Manager, Optician

Affiliated Doctors of Optometry

04/2011 - 06/2021

Education

B.S - University of Colorado at Boulder - Boulder, CO

2006-2010

Certificate of Completion - Hack Reactor - Software Engineering Immersive - Denver, CO

2021
